Professional Summary

DevOps and Cloud Engineer with experience designing cloud-native infrastructure, automating deployments, and building scalable platform engineering solutions across Azure and AWS. Skilled in Kubernetes, Terraform, Azure DevOps, GitHub Actions, Infrastructure as Code, Azure Databricks, CI/CD, and distributed systems. Passionate about cloud architecture, automation, observability, and building reliable cloud-native platforms.

Education

Year	Degree / Examination	Institution	Grade	Location
2022–2026	B.Tech in Artificial Intelligence & Data Science	Poornima College of Engineering	9.08 CGPA	Jaipur
2021–2022	Senior Secondary (XII)	Lord Buddha Public School	92.2%	Kota

Experience

DevOps & Cloud Engineer

Dec 2025 – Present

Celebal Technologies

- Automated Azure Databricks deployments using Declarative Automation Bundles (DAB) integrated with Azure DevOps CI/CD pipelines.
- Designed Infrastructure as Code solutions using Terraform for Azure and AWS, enabling repeatable cloud provisioning.
- Built and maintained CI/CD pipelines using Azure DevOps and GitHub Actions for application and infrastructure deployments.
- Deployed and managed containerized applications on Kubernetes using Docker, improving deployment reliability and scalability.
- Collaborated on cloud platform engineering initiatives involving networking, identity management, observability, and deployment automation.

Technical Skills

Programming: Python, Bash, SQL, Java, YAML, JSON **Cloud Platforms:** Microsoft Azure, AWS, Azure Databricks
Containers & Orchestration: Docker, Kubernetes, AKS, EKS, Helm, Istio **DevOps:** Azure DevOps, GitHub Actions, CI/CD, Terraform, IaC, Git
Data Engineering: Azure Data Factory, PySpark, Delta Lake **Monitoring:** Prometheus, Grafana, OpenTelemetry **OS:** Linux

Projects

KSP Crime Intelligence & Analytics Platform Python · FastAPI · LangGraph · Qdrant · Neo4j · PostgreSQL · Redis · Docker · GitHub Actions [GitHub](#)

- Engineered an AI-powered crime intelligence platform enabling conversational investigation, suspect profiling, relationship analysis, and data-driven policing using LLMs and Retrieval-Augmented Generation (RAG).
- Built a production-ready backend integrating **Qdrant** for semantic vector search, **Neo4j** for graph analytics, and **PostgreSQL + Redis** for transactional storage and high-performance caching, secured with JWT-based RBAC and containerized deployment.

Distributed Trading Benchmarking & Hosting Platform Go · AWS EKS · Terraform · Kubernetes · Helm · AWS ECR · RDS PostgreSQL · ElastiCache Redis · Next.js · GitHub Actions · Prometheus · Grafana · Redpanda · TimescaleDB [GitHub](#)

- Architected a cloud-native distributed platform for hosting, benchmarking, and stress-testing high-frequency trading engines with concurrent execution, real-time leaderboards, and automated evaluation pipelines.
- Provisioned production-ready AWS infrastructure using **Terraform**, including **VPC**, **Amazon EKS**, **Amazon RDS PostgreSQL**, **ElastiCache Redis**, and **Amazon ECR**, enabling scalable and resilient platform operations.
- Implemented Kubernetes deployments using **Helm Charts**, **Gateway API**, and Network Load Balancer-based ingress while developing backend services in **Go** for benchmark orchestration, submission workflows, and trading engine execution.
- Established observability and CI/CD using **Prometheus**, **Grafana**, and **GitHub Actions**, leveraging **Redpanda**, **TimescaleDB**, and **Redis** for event streaming, time-series analytics, and low-latency caching.

DoraDB — Production-Grade Database Engine Go · Database Internals · Storage Engine · B+ Trees · WAL · Query Engine · Distributed Systems [GitHub](#)

- Building a production-inspired database engine from scratch in Go to explore storage engines, indexing, query processing, concurrency control, and distributed database architecture.
- Implementing foundational components including page-based storage, Write-Ahead Logging (WAL), B+ Tree indexes, SQL parsing, and a modular query execution engine designed for future replication and fault-tolerant distributed execution.

Certifications

Microsoft Certified: Azure Administrator Associate (AZ-104) | Microsoft Certified: Azure Developer Associate (AZ-204) |
Microsoft Certified: Azure AI Engineer Associate (AI-102) | Microsoft Certified: Fabric Data Engineer Associate (DP-700)
| Oracle Cloud Infrastructure Architect Associate | Databricks Certified Machine Learning Associate
